|-----------------|--|----------|
| SI27.19-P-0005A | Service information: Return of diagnostic data for electronic transmission control (ETC) and electrohydraulic actuator (EHS) | 23.11.05 |
|-----------------|--|----------|

TRANSMISSION 722.6 as of 1.1.02 in MODEL 163, 170, 171, 199, 203, 209, 211, 215, 219, 220, 221, 230, 240
TRANSMISSION 722.8 in MODEL 169, 245
TRANSMISSION 722.9 in MODEL 164, 171, 203, 209, 211, 215, 219, 220, 221, 230

i If an electronic transmission control (ETC) or an electrohydraulic actuator (EHS) is replaced and returned for analysis, a control unit log must be enclosed with the control unit (effective immediately). To make printout of the log easier, the menu item "Control unit log" is provided as of DAS version 09/2005. In this menu item, the following data is compiled automatically and can then be printed out:

The menu item "Control unit log" can be found in the main menu for the respective control unit.

To ensure specific analysis of the control units, it is important to fill in the field "Customer complaint (remarks regarding damage)" and to give any other information concerning the damage.

- Control unit data
- Vehicle data
- Customer complaint (to be filled out by workshop personnel)
- Fault memory
- Freeze frame data
- Quick test
