 Passenger Car

Modified A. C. Evaporators - W 211

Kind Attention - Workshop Managers

Dear All,

In line with our continuous quality improvement policy and enhancement of customer satisfaction, modified evaporators are being fitted at factory in few W 211 vehicles to ascertain the effectiveness of these evaporators against the complaints of leakage and foul smell that has been observed in isolated cases. The list of these vehicles is attached herewith for your ready reference.

In case you receive any complaint mentioned above on these vehicles and if you are confirmed that the foul smell is originating only from the evaporator, please do not carry out fumigation or dismantle evaporator. Kindly contact us immediately for further instructions.

In case of any queries, please feel free to contact us.

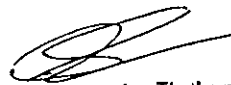

Thanking you,

With best regards,
