Modification at washer water container, S 320 L (220.165)

Dear Mr. Cama,

As per the information received from Production department, a minor modification is required to be carried out on washer water container in the following vehicle during its next visit to the workshop.

- WDB 220 165 6A 191184

The details of the action to be carried out are as follows.

'Open engine hood. Pull pump with hose from the water tank. Temporarily close the opening of the water tank. Pull out hose from the pump and put the angle piece on the pump (bent downwards). Latch the water hose at the free end of the angular piece and then insert the pump in the water tank (Please refer enclosed figure)'

The required angular piece (one no.) for the above vehicle is supplied with this document.

You are requested to send us the report on completion of this action.

Thanking you,

With best regards,
