Service measure during next workshop visit
Replace seal at engine oil filler neck
Model 211 with OM 642 engine

Dear All,

On the vehicles mentioned in the attached list, a filler neck for the engine oil with an extended collar is to be installed. This action will ensure that the oil spilled when filling the engine oil does not run down the engine which in turn can cause a short circuit there through contact with the alternator, and thereby preventing the battery charging.

This work is to be carried out at the vehicles' next workshop visit. Please refer to the attached work instructions for the required steps. Please note that the locations mentioned in the list are only indicative and any vehicle mentioned in the list visiting your workshop has to be attended for this Campaign.

For operation texts, flat rates and spare part details, please refer to the attached work instructions.

Damage Code: 015910327

Cost settlement:

A warranty/goodwill claim for the costs of material and labor can be submitted quoting accounting number 1591032.

Completion deadline

This field campaign should be completed by **31st December 2008**.

Please advise your concerned staff accordingly and ensure that each vehicle (mentioned in the list) visiting your workshop is attended for this action.
